DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 36-52 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over all claims of U.S. Patent No. 6224631. Although the conflicting claims are not identical, they are not patentably distinct from each other claiming the same implant comprising the same elements.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 51-52 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the

Application/Control Number: 09/777,631

Art Unit: 3738

application was filed, had possession of the claimed invention. Claim 51 claiming the central support member having a first and second height is not supported in the application. Figure 9, for example, shows a difference in thread height only.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in-
- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1, 36-41 and 43-52 are rejected under 35 U.S.C. 102(e) as being anticipated by Errico et al (5,904,719).

Errico et al teaches a vertebrae implant comprising a first end 205 having a first diameter and second end 203 having a second larger diameter spaced along a longitudinal axis (see figure 3 showing implant having a diameter and figure 7 teaching a continuous taper); first surface 204; second surface 206; central support member can be interpreted as either elements 108, 110, or both combination with bore 112 extending within.

Application/Control Number: 09/777,631

Art Unit: 3738

The implant is interpreted as having an I-shape cross-section.

Claim 51 is rejected under 35 U.S.C. 102(b) as being anticipated by Knothe (WO 97/15247).

Knothe teaches a vertebrae implant comprising a first surface 3 and a second surface 4 and a central support member 10; the implant having a I-shaped cross section.

Claim 51 is rejected under 35 U.S.C. 102(e) as being anticipated by McKay (6,146,420).

Referring to figures 22-23, McKay teaches a vertebrae implant comprising a first surface 91U and a second surface 91U and a central support member; the implant having a I-shaped cross section.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 36-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohrs et al (5,609,636) in view of Steffee (5,443,514).

Art Unit: 3738

Referring to figures 17-21, Kohrs et al teaches a vertebrae implant comprising a first surface including elements 401, 402; second surface including elements 403, 404; central support member can be interpreted as either elements 405- 407, or elements 408-410 or the combination of both set with bore extending longitudinally within. However, Kohrs et al is silent regarding said first and second surfaces tapering.

Steffee teaces a vertebrae implant where the first and second surfaces taper.

See column 2, lines 32-43. It would have been obvious to one having ordinary skill in the art to have tapered the surfaces of Kohrs as taught by Steffee "to give the spinal implant a wedge shape for use in portions of the spine with a lordotic curve."

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
